

Oral Presentation

Speakers will be allocated a total of 10-15 minutes for their oral presentations. The precise time-duration of presentations will be established later, based on the number of accepted oral communications. It is anyway suggested to save 5 minutes to allow for questions/discussion.

The Congress language is English. Text in slides accompanying presentations must be in English. Although giving presentations in English is not prerequisite for acceptance, all participants are expected and strongly encouraged to present their communications in English.

All presentations will be displayed via the University computers (Windows PC, PowerPoint file format). Speakers will not be allowed to use their own laptop.

It is recommended to test presentation files during the meeting in order to assess their compatibility with the University PCs. Please, ask staff on site.

Files ready for presentation should be handed to the organizers well in advance:

for a.m. presentations, organizers should receive files at the beginning of the p.m. sessions of the previous day

for p.m. presentations, organizers should receive files at the beginning of the a.m. sessions of the same day
